PROFESSIONAL SUMMARY

Dedicated IT Specialist and Full-Stack Developer with a proven ability to build systems, make strategic technical decisions, and implement the best software solutions for business growth. I am a team leader who thrives on solving real-world problems and coordinating partnerships to optimize company operations. Passionate about creating seamless digital experiences, I combine my expertise in web and mobile app development (Flutter, Laravel) with hands-on experience in IT infrastructure, networking, and digital marketing to deliver comprehensive technical solutions.

PROFESSIONAL SKILLS

Programming & Development

- Dart (Flutter), C#, Python, PHP, MySQL.
- Laravel, Firebase.

IT Infrastructure & Networking:

- Docker, Git, GitHub
- Basic Networking (Point-to-Point)
- Linux Server Configuration, Hardware Maintenance.

Digital Operations & Marketing:

- Social Media Management
- Digital Video Advertising (Meta)
- Data Entry, Systems Administration.

Leadership & Management

- Technical Decision Making
- Team Leadership
- Problem-Solving
- Cross-functional Collaboration.

TECHNICAL PROJECTS

Automated Student Registration System:

Developed a comprehensive web-based platform for college admissions. The system automates new student onboarding and instantly generates digital ID cards equipped with custom QR codes, allowing staff to seamlessly scan and retrieve detailed student profiles.

Vehicle & Owner Management System (C#):

Engineered a secure, offline desktop application using C# for Rawa Auto Auction to efficiently register, store, and manage incoming vehicle inventory and corresponding owner information.

Car Shipping Cost Calculator:

Built a standalone, single-page web application for Rawa Auto Auction designed to calculate precise car shipping costs for clients based on specific logistical variables.

BMI Calculator Mobile App:

Designed and developed a mobile application that accurately calculates Body Mass Index (BMI) by processing user-inputted data, including gender, height, and weight.

WORK EXPERIENCE

IT & Systems Specialist

Rawa Auto Auction

05/2025 – Present

Erbil

- **System Leadership & Development:** Researched and integrated robust new tracking software to replace outdated systems, significantly improving operational efficiency. Developed custom internal tools (Shipping Calculator, C# Management System) to fill operational gaps.
- **Digital Marketing & Operations:** Managed all company social media channels, executing successful digital advertising campaigns for video content to drive engagement. Ensured accurate and timely data entry for critical business operations.
- **Infrastructure Management:** Upgraded the company internet to FTTH, which made the team more productive.
- **Partnership & Collaboration:** Visited external sites as a team leader to build partnerships and worked with international developers to improve mobile apps and Systems.
- **Team Management:** Led the technical team and interviewed new staff to ensure they had the right creative skills.
- **Recognition:** Received a Certificate of Appreciation for excellent work and commitment.

HABITS & CONTINUOUS LEARNING

I'm passionate about becoming a full-stack web and mobile app developer. Every day, I dedicate time to improving my programming skills and learning new technologies - especially in Flutter, Laravel, and backend integration. I enjoy building real projects, experimenting with new ideas, and continuously growing as a developer.
